JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Recent Important Books

Readings in Greek History

Edited by Ida Carleton Thallon, Vassar College.

xxix + 638 pages, $2.00

A collection of extracts from the primary sources of Greek History, covering the period from the time of Homer to the battle of Chæronea. The book places in the hands of the student much material hitherto not available for those unacquainted with Greek, including a liberal number of historical inscriptions, selections from the orators, and illuminating passages from the lyric and dramatic poets, as well as the historians and writers of travel.

The Religion of the Hebrews

By John Punnett Peters. **xii + 502 pages, $2.75**

An interesting and authoritative study of the development of the religion of the ancient Hebrews from its rudest beginnings to its final completed form. In treatment it combines the historical, the descriptive and the philosophical, and it throws much light on the mode of life and thought of this early pastoral people.

Problems in Political Evolution

By Raymond G. Gettell, Amherst College. **400 pages, $2.00**

A scholarly attempt to formulate and trace the evolution of the fundamental problems of government. It supplies a readable analysis of past developments, present conditions, and future needs, especially in democracies.

Legends and Satires from Mediaeval Literature

Edited by Martha Hale Shackford, Wellesley College.

xi + 176 pages, $1.25

Selections not hitherto available in translation from the highly significant minor literature of the Middle Ages. The book furnishes a vivid first-hand picture of habits of thought and manners of life in this important period of history.

The Mathematical Theory of Investment

By Ernest Brown Skinner, University of Wisconsin

245 pages, $2.25

The theory of interest, both simple and compound, the amortization of debts by various plans, the theory of bond values, depreciation, sinking funds, inheritance taxes, old-age pensions, and life insurance are some of the subjects treated. The sections on depreciation contain material hitherto unpublished and will prove of special interest to those engaged in the solution of the important problems of adjusting the rates for public utilities. As a mathematical handbook for economists and statisticians, as well as for the up-to-date educated business man, the volume occupies a unique place.

The Development of Modern Europe

By JAMES HARVEY ROBINSON and CHARLES A. BEARD of Columbia University.

Volume I. The Eighteenth Century; The French Revolution and the Napoleonic Period. 362 pages, $1.50.

Volume II. Europe since the Congress of Vienna. 448 pages, $1.60.

One of the best known and most satisfactory treatments of modern European history available for college use. It traces the development and growth of the States of modern Europe in a narrative in which accuracy, interest, and a just and discriminating sense of historical values are notable features. Fundamental economic and social matters—the Industrial Revolution, commerce and colonization, social and political internal reforms—receive the emphasis which is their due, while purely military events are given less space than has commonly been assigned them in textbooks in history. A course in Robinson and Beard's "Development of Modern Europe" will prepare the student for a real and active appreciation of the results, immediate and eventual—whatever these may be—of the present conflict in Europe.

Readings in Modern European History

By JAMES HARVEY ROBINSON and CHARLES A. BEARD of Columbia University.

Volume I. 410 pages, $1.40.
Volume II. 541 pages, $1.50.

A collection of extracts from sources to accompany "The Development of Modern Europe," to which it corresponds in organization, chapter for chapter and section for section. The selections are chosen with the purpose of illustrating the important social, political, and economic phases of European history for the last two hundred years. The utterances of Bismarck, Karl Marx, Garibaldi, Gladstone, Chamberlain, Voltaire, and Mill are representative of the contents, while quotations from state papers and speeches and from newspapers are abundant. "Readings in Modern European History" furnishes a detailed and colorful picture of European history as it appeared to those who were looking on at its making.
